J., carrying a throng to view the brittle and can be cast but not mawonders of the first community light-chined like illium.

> Declaring that the use of electricity for lighting is yet only in the first stages of development, the speakers pointed out that general use of the Edison invention did not come until the last ten or fifteen years and that up to that time kerosene and gasoline lamps and candles were widely used. But now even small communities have electric lighting plants and farm homes are lighted in a similar way while the application of electric power to practical uses has been widely extended.

May Form New Union

ST. LOUIS, Mo., Nov. 7 .- A campaign to form a national association of newspaper writers, the object of which is to place the profession on a high plane and obtain better wages, has been launched by the St. Louis Association of Journalists. The proposed organization is to be known as the American Association of Journalista, and all active newspapermen will be eligible to membership.

Circulars explaining the proposition have been sent to papers in all parts of the country, it was announced, and a national convention the early part of next year is contemplated. Richard L. Stokes, president of the local Britt Smith has turned state's evi- organization, announced that requests for chapters have been received from
